

It ain't over till it's over.
HEALTH CARE FOR ALL!

The struggle for reform will not cease until everyone in the U.S. has high quality, affordable health care.

Does Obamacare (the Affordable Care Act) give you what you need?

Sure, more people will be insured under the new law. But...

- **You** could be one of 31 million Americans (967,000 in Illinois) who will remain uninsured, or one of the tens of thousands who will die needlessly because you lack insurance.
- **Your family**, like millions of middle-income families, could find you can afford only the most basic insurance – and then be unable to use it because of high deductibles and co-pays.
- **You** could be forced into a plan with limited provider networks, unable to choose your own doctors.

There is a better way – health care that covers everyone *and* gets our nation's health care costs under control.

Improved Medicare for All combines the best of the left (it's publicly funded, like our police and fire departments) and the right (it's privately delivered and cost-effective).

What's in it for you?

- **Comprehensive benefits**, including primary and specialty care, hospital care, prescription drugs, mental health care, long-term care, and more.
- **Health care decisions** in the hands of doctors, nurses, and patients – not insurance companies.
- **The freedom to choose** your own health care providers.
